## MIC Attains ACR Accreditation

The Magnetic Imaging Center is most proud to announce the completion of our American College of Radiology (ACR) accreditation. Accreditation by the ACR demonstrates a commitment to quality care, patient safety and sets us apart from our competition. Completing this program is our way of letting our patients and the health care community know that we provide quality health care that meets the needs of our patients and the professional expectations of our peers.

The program is designed to be educational in nature and evaluates the qualifications of personnel, equipment performance, effectiveness of quality control measures and quality of clinical images. It is believed that these are the primary factors that impact the quality of clinical images and quality of patient care. Central Pennsylvania has our long-term commitment to quality and excellent patient care.

With much thanks to our advertising agency, Campbell, Harrington and Brear of York, we are pleased to announce the completion of our new, updated website, [www.micmri.com](http://www.micmri.com). We wanted to make an informative and useful site that made sense for our referral offices. Now you can review our privacy policy on-line, download a printable referral sheet, review our list of indications for new studies, such as cardiac MRI, breast MRI, and abdominal MRI, captured with our latest software advancement, GE's LAVA (Liver Acquisition and Volume Acceleration). Most importantly, both physician and patient are able to fill out on-line surveys, so that we may take care that we are providing the best possible service for both our referrers and the patients that count on us to take care of them.

SIPRESS  
"Let the healing begin!"

A distraught man ran into the doctor's office.  
"Doc!" The man screamed, "I've lost my memory!"  
"When did this happen?" asked the doctor.  
The man looked at him and said,  
"When did what happen?"

"Ready to head back?"

# MIC Spring Calendar of Events

## MIC Announces 2006 Lectures

This year the Magnetic Imaging Center will be giving two lectures: Breast MRI (Oct. 5), presented by Dr. Neeti Goel and Abdominal MRI (Nov. 9) presented by Dr. Keith Haidet. The Hilton in Harrisburg will be the venue—look for coming announcements and invitations!

## March 23rd; MIC Partakes in ACS Daffodil Days

Spring has definite sprung at the Magnetic Imaging Center as the MIC staff purchased daffodils from the American Cancer Society campaign to raise crucial dollars for cancer control programs, patient services and cancer research. As the first flower of Spring, the daffodil symbolizes hope and re-birth—and they provided a much-needed burst of sun! As always, a pleasure to support the ACS.

## Friday, June 9, 2006; MIC to Attend the National Multiple Sclerosis Society's annual

### Dinner of Champions Event

We look forward to sponsoring and attending the 34th anniversary of the MS Dinner of Champions event at the Hershey Lodge. The guest speaker for this year will be former Pittsburgh Steeler and hall-of-famer, Jack Ham. The Central Pennsylvania chapter of the NMSS offers services designed to maximize abilities in order to maintain independence so that people may continue to participate fully in job, family and community. They are committed to ending the devastating effects of multiple sclerosis.

## MIC Staff Member of the Quarter: Anand S. Jagannath, M.D.

We know him, we love him,  
Anand S. Jagannath, M.D.

Dr. Jagannath ( a.k.a.- “the energizer bunny”) came to Central Pennsylvania after completing a fellowship in interventional radiology. He graduated from Cornell Medical College and finished all of his training at the New York Hospital-Cornell Medical Center where he served as chief resident during his final year.

While primarily interested in minimally invasive alternatives to surgical techniques, he continues to be actively involved in all aspects of radiology, especially new and innovative techniques in MR, PET and CT.

Dr. Jagannath served as chairman of the radiology department at Holy Spirit

Hospital from 1995-2003 and president of the medical staff in 2003. He served on the board of directors of Quantum Imaging and Therapeutic Associates from 1997-2005. He currently serves as medical director of the HACC ultrasound technologist training program and as advisor to the Clinical Advisory Committee of Capital Blue Cross.

He is married to a “real doctor”—Dr. Wendy Schaenen of Internists of Central Pennsylvania and has two children who attend the Harrisburg Academy. His personal interests are sailing, scuba diving, and gardening.
